NEWBORN USE ONLY  
GIVEN ON DOCTORS ORDER ONLY

LIPID EMULSION – OMEGAVEN ALONE Emulsion

ALERT  Unregistered Product. Needs to obtain written parent consent and TGA approval. Please talk to Sally Wise, NUM prior to prescription

USE  Prevention/Treatment of parenteral nutrition associated cholestasis.

PRESENTATION  Omegaven 10% and Clinoleic 20% (1:2 ratio) mixed with soluvit and vitalipid is supplied by Baxter in 50 mL syringe or 150ml bag

Omegaven Emulsion – 50 mL syringe contains:
- Omegaven 10% 36 mL
- Vitalipid 10% 11.2 mL
- Soluvit-N reconstituted in WFI 2.8 mL
- Total 50 mL

Omegaven Emulsion – 150 mL Bag contains:
- Omegaven 10% 108 mL
- Vitalipid 10% 33.6 mL
- Soluvit-N reconstituted in WFI 8.4 mL
- Total 150 mL

DOSE  Start the lipids at 1 g/kg/day and increase by 1 g each day to 3 g/kg/day depending on plasma triglyceride monitoring
