# MENTAL HEALTH BUSINESS RULE

## Clinical Handover for Mental Health Services (ISBAR)

**SESLHDBR/040**

### 1. POLICY STATEMENT

The SESLHD Mental Health Service (MHS) ensures that clinical handover undertaken by all staff working within the MHS follows the Key Principles for safe and effective clinical handover as mandated by the NSW Health Policy Directive [PD2019\\_020 Clinical Handover](#), the SESLHD Procedure [SESLHDPR/303 Clinical handover: Implementation of ISBAR Framework and Key Principles](#) and the requirements under [National Safety and Quality Health Service \(NSQHS\) Standard 6 Communication for Safety](#).

### 2. BACKGROUND

Clinical handover refers to the transfer of professional responsibility and accountability for some or all aspects of a consumer's care to another person or professional group, on a temporary or permanent basis. It is a critical component of safe, high-quality healthcare. Effective handover ensures that important clinical information is communicated clearly and completely, enabling continuity of care, reducing the risk of errors, and supporting informed clinical decision-making. The intent of clinical handover is to maintain patient safety and care quality across transitions, such as shift changes, transfers between departments or facilities, or changes in care teams. Poor communication risks Consumer Safety and contributes to adverse outcomes.

#### 2.1. Definitions

**Formal clinical handover** occurs at many points in the consumer journey and may occur face-to-face or via telehealth. All staff are required to participate in effective clinical handover using a timely, relevant and structured process that results in transfer of responsibility and accountability for care. Information handed over must be supported by documentation in the appropriate healthcare record. It is recommended that **Formal** Clinical Handovers occur at a scheduled and allocated time, at a consistent venue, include the consumer, family and carer where possible.

**Informal clinical handover** may occur throughout the shift eg when staff leave the Unit for meal breaks or when a treatment plan is updated. It is recommended that staff utilise a standardised formality, as outlined in section three, regardless of the formality.

**Safety Huddles** are not recognised as a clinical handover. They can include updates non-clinical factors that may impact safety of the overall unit such as: Bed availability and patient flow.

- Staff levels/availability.
- Relevant contact person eg Fire Warden, Responder, On-Call.
- Any environmental, consumer or equipment risks.

### 3. COMMUNICATION SCRIPT

#### 3.1 ISBAR

The ISBAR script (Appendix A) Introduction, **S**ituation, **B**ackground, **A**ssessment and **R**ecommendation is the structured framework to be used when communicating clinical handover. The ISBAR provides a framework to ensure clear, concise and

effective communication. When a staff member completes clinical handover by using the ISBAR, it is determined that the receiving staff member has undertaken responsibility of care.

### 3.2 Electronic Journey Board (EPJB)

The SESLHD MHS system for Clinical Handover information is the EPJB, which has ISBAR functionality. Local Procedures exist to define each Unit's unique EPJB set up and template used for Handover.

## 4. Clinical Handover scenarios

Inpatient	
Nursing staff	<p>The Nurse Unit Manager/Nurse In Charge (NIC) is responsible for:</p> <ul style="list-style-type: none"> <li>Ensuring that documents before shift change include up-to-date clinical information, including treatment and discharge plan. This may include updating the ISBAR via the EPJB, information must be contemporary and not prepopulated from previous shifts.</li> <li>Ensuring a designated area that is confidential for handover to occur.</li> <li>Ensuring attendance and that handover keeps to time schedule.</li> <li>Ensuring staff have protected time to participate in handover with minimal interruptions and without impacting consumer safety (ensure appropriate staff coverage for the handover period).</li> <li>Staff using recovery-oriented, person centred, and strengths focused language.</li> <li>Ensuring that, after Clinical Handover has occurred, the outgoing and incoming staff member greet the consumer (and carer if in attendance) together, to inform of the change in allocated staff member and document that this has occurred in the consumer's eMR.</li> </ul>
Medical staff	<p>SESLHD MHS provides an emergency medical escalation service outside of business hours, referred to as "Consultant on-call"</p> <ul style="list-style-type: none"> <li>During business hours, the mental health treating teams must: <ul style="list-style-type: none"> <li>Identify consumers that are likely to require medical support during the "Consultant on-call" period.</li> <li>Have a clearly documented medical management plan, MH Care Plan, and charted medications.</li> <li>Provide a Clinical Handover to the "Consultant on-call" (usually via telephone) and document this call in the consumer's eMR and inform NIC</li> </ul> </li> <li>Prior to the medical shift change, the "Consultant on-call" must document in the consumer's eMR and provide a Clinical Handover (either via telephone or face-to-face) using the standard ISBAR format, to the mental health treating team.</li> </ul>
