# SESLHD PROCEDURE

## Upload of NDIS Hospital Discharge Report into the Patient Electronic Medical Record (eMR) and Release of Information

**SESLHDPR/784**

### 1. POLICY STATEMENT

This procedure applies to all SESLHD clinical staff that submit NDIS Hospital Discharge Reports to the National Disability Insurance Agency (NDIA).

The NDIS Hospital Discharge Report includes important health information and forms part of the medical record. Importing the document into the patient's electronic health record (eMR) ensures that it is stored and available for ongoing care management.

This procedure provides guidance for SESLHD clinical staff on the process to import completed NDIS Hospital Discharge Reports into the electronic medical record. It also provides guidance on their release if requested.

### 2. BACKGROUND

A NDIS Hospital Discharge Report (HDR) is completed by the multidisciplinary team to support the safe and timely discharge of NDIS participants. The report outlines the findings of clinical assessments and provides information to help the NDIA understand the participant's needs upon discharge, such as personal care, daily living supports, and assistive technology.

The final HDR is submitted by the healthcare team to the SESLHD Disability Strategy Unit who submit it to the NDIA as per the SESLHD NDIS Hospital Discharge Escalation Pathway. The report also forms part of the health record and should be sent to the relevant Health / Medical Record Department by email for importing into the eMR.

### 3. DEFINITIONS

**NDIS Hospital Discharge Report (HDR):** This report provides the National Disability Insurance Agency (NDIA) with information regarding clinical observations that describe a person's functional profile while in hospital

### 4. RESPONSIBILITIES

#### 4.1 Employees will:

- Ensure that HDR's are forwarded to the appropriate Health Information / Records Department.
- Follow the procedure below.

#### 4.2 Line Managers will:

- Ensure staff are aware of and monitor compliance with the procedure.
- Support staff to follow the procedure

#### 4.3 District Managers/ Service Managers will:

- Support staff to follow the procedure.

## Upload of NDIS Hospital Discharge Report into the Patient Electronic Medical Record (eMR) and Release of Information

**SESLHDPR/784**

### 4.4 Health Information/ Records Managers will:

- Ensure that processes are in place to import the HDR into the eMR.
- Monitor and audit the importing process as per this procedure.
- Oversee the release of information for requests for the HDR.

## 5. PROCEDURE

### 5.1 Multidisciplinary team:

- Confirm the document type and title is clear and correct - 'NDIS Hospital Discharge Report' (Appendix 1).
- The HDR must include four identifiers: Given name and Family Name, MRN, DOB and sex on the top right-hand corner of every page.
- The HDR must include the clinicians name, signature and date of encounter.
- The approved document must be scanned as a PDF by administrative / clinical staff as determined by Department Head and sent by email to the relevant Health Information / Record Department email address (see table below).
- The HDR is emailed to the Disability Strategy Unit for escalation to the NDIA.

### 5.3 Health Information / Record Department – Release of Information:

- HDR is **NOT** to be released by Health Information / Medical Record Department as part of regular ROI requests from patient or third party.
- HDR to be released if records are required for subpoena, Ombudsman investigation, HCCC inquiry, Coroner's case, any internal review or legal proceedings.
- HDR may be released to the patient when explicitly requested using [eMR QRG: Printing a Single Document with Medical Record Request](#). No fee should be raised.
- To support the above, the HDR will only be available in Report Request (XR) within the "Full Medical Records Template - Encounter Summary" and "Full Medical Records Template XR".

### 6. DOCUMENTATION

Not required.

### 7. AUDIT

Monthly auditing will be attended by the SESLHD Medical Record Managers to:

- Monitor numbers of documents uploaded
- Ensure documents are uploaded to the correct patient, encounter and note type.
