COURSE DESIGN AND AIM

This seminar is designed for Nurses, Physiotherapists and Occupational Therapists who are interested in improving their knowledge, skills and their application in hand wound management.

The seminar will have a strong emphasis on current evidence based practice and clinical reasoning in treatment planning.

The seminar will comprise of a combination of lectures and practical workshops, conducted by senior clinicians working at Sydney Hospital Hand Unit, providing participants with opportunities to develop their clinical knowledge and application to practice.

SEMINAR TOPICS

- Pathophysiology of wound healing
- Wound management from the Hand Therapist perspective
- Co-morbidities that affect wound healing
- Suture removal
- Scar management
- Clinical reasoned approach to wound product selection
- Wound Assessment and management interactive discussion of case studies
