

INTRODUCTION TO ACCELERATED IMPLEMENTATION METHODOLOGY

About the workshop

SESLHD offers the 2 day course, *Introduction to Accelerating Implementation Methodology (AIM)* to upskill staff in substantially improving the likelihood of implementation success.

AIM focusses on **ACCELERATION OF CHANGE**. It sits alongside any improvement approach to ensure the **PEOPLE SIDE** of change is understood and managed. It is a **STRUCTURED, YET FLEXIBLE**, repeatable 10 step process to implement and sustain a different way of working. The course will increase project leaders chance of successfully implementing change and increases their confidence, enabling them to become a better health leader.

You will learn:

- The difference between installation and implementation
- That sponsorship is about action and position, and is critical for implementation success, and how to create effective sponsorship
- The specific roles that managers play are integral to implementation success
- That resistance to change is natural and how to manage it
- How to achieve more impact with less effort in less time
- The skills required to become an effective change agent and influencing leader
- Practical tools and assessments to help accelerate change and make it stick

What the AIM alumni say:

- “...a very stimulating and thought provoking training”
- “Very practical, tangible, take home use immediately tools & framework to deliver change successfully, effectively and reliably”
- “I found the AIM course very empowering and motivational”
- “A very action focussed approach to change management”
- “Excellent delivery of content relevant to real life practice. I can't wait to try out some of the ideas in my workplace!”

Enrol at My Health Learning (Once logged in, search for 'AIM').
