

Week 22

Gyn/OB

1. What are the potential causes of PV bleeding in women? And what is the emergency management of severe PV bleeding?

2. What is the discriminatory level of HcG?

3. What are the clinical features and treatment of Toxic Shock Syndrome?

4. What are the risk factors for Ovarian hyperstimulation syndrome?

5. What are the main issues in sexual assault?

6. What are the main investigations required in sexual assault victim?
Chain of evidence should always be maintained

7. What are the main management steps in a sexual assault victim?

8. What is the preferred regimen of post-coital contraception?

9. Complete the type of miscarriage in the table below:

Assessment of miscarriage		
Type	Cervix	Products passed
	Closed	None
	Open	Partial
	Open or closed	All
	Open	None
	Closed	None (no fetal heart)

10. What is the risk of progression to complete miscarriage for threaten miscarriage?

11. What are the risk factors for ectopic pregnancy?

12. Where is the most common site for ectopic pregnancy?

13. What is heterotopic pregnancy?

14. What is the potential use of Methotrexate in ectopic pregnancy?

15. What are the complications of PID?

16. What is the treatment for PID?

17. What is the management of ovarian cyst?

17. What is the estimated age of pregnancy if the fundal height is palpable at:

12 weeks

20 weeks

20-40 weeks

40 weeks:

18. What age of pregnancy fetal heart sounds are normally detectable?

19. What are the characteristics of hyperemesis gravidarum?

20. What are the basic investigations required in a patient with hyperemesis gravidarum?

21. What are the causes of antepartum haemorrhage?

22. What is abruptio placentae? And what is the fetal mortality rate?

23. What are the risk factors for abruptio placentae?

24. What are the symptoms and signs of abruptio placentae?

25. What are the required investigations and the management of a patient suspected of suffering from abruptio placentae?

26. What is the definition of placenta praevia? And what are the different types of it?

27. What are the symptoms of placenta praevia?

28. What is the management of placental praevia?

29. List the different types of hypertension during pregnancy?

30. What age of pregnancy is preeclampsia likely to occur?

31. List the potential symptoms of pre-eclampsia?

32. What are the risk factors for pre-eclampsia?

33. What are the criteria for diagnosis of pre-eclampsia?

34. What are different severity of pre-eclampsia?

35. What are the investigations required for a patient suspected of pre-eclampsia?

36. What are the indications for treatment of pre-eclampsia and what is the treatment?

37. What are the indications for immediate delivery in a patient with pre-eclampsia?

38. What is HELLP syndrome?

39. What are the symptoms of HELLP syndrome?

39. What is the management of HELLP syndrome?

40. What is the definition of eclampsia?

41. What is the mortality of eclampsia?

42. What are the complications of eclampsia?

43. What is the management of eclampsia?

44. What are the symptoms and signs of acute fatty liver of pregnancy? And what is the management ?

45. What are the differences between acute fatty liver of pregnancy and HELLP syndrome?

46. What is the mortality for AFLP and what are the potential long term effects of this disease?

47. What is the definition of premature labour?

48. What is management of premature labour?

49. What are the contraindications for suppression of labour ?

50. What is fetal fibronectin?

51. What are the characteristics of a true labour pain?

52. What are the stages of labour?

53. What are the important aspects of assessment in a pregnant patient in potential labour?

54. What are the features of imminent delivery?

55. What degree of dilatation of cervix is correlated with unlikely delivery in the next hour?

56. List your management of unexpected delivery in emergency?

57. List the steps of management after delivery?

58. What are different types of decelerations?

59. What is acceleration?

60. What are the characteristics of normal intrapartum CTG?

61. What are the characteristics of abnormal CTG requiring urgent action?

62. What is cord prolapse during labour and what is the management?

63. What is turtle sign?

64. What is the management of shoulder dystocia?

65. What is the definition of post partum haemorrhage?

66. What are the causes of post partum haemorrhage?

67. What are the risk factors of post partum haemorrhage?

68. List your management of post partum haemorrhage?

69. What are the potential problems unique to pregnant trauma patient?
