Prescribing

Prescribing

At POWH, there are several different systems used to prescribe medications

Electronic

- eMR Powerchart – most of the time
- FirstNet – in ED
- eRIC – in ICU
- MOSAIQ – for chemotherapy

Paper

- POV prescriptions (generated from eMR) – on discharge
 - POV2 = Prescription Output Version 2
- PBS prescriptions (handwritten) – on discharge
 - Also known as “outside scripts”
 - Can be used for non-PBS items as well
- Outpatient prescriptions – in clinics or for S100 drugs
- Paper charts in some clinical areas – operating theatres, medical imaging
- Paper charts for some specific medications – IV heparin, IV insulin, PCA, TPN

PRESCRIPTION *ONLY valid for supply to hospital patients at the Hospital Pharmacy 86661

We will go more into the 'how' later...

What can we prescribe?

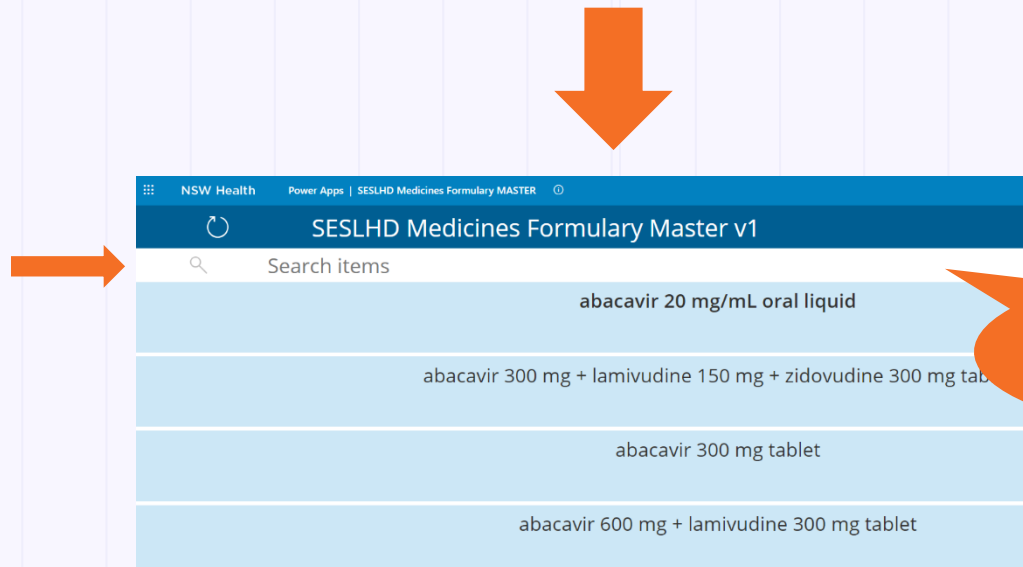

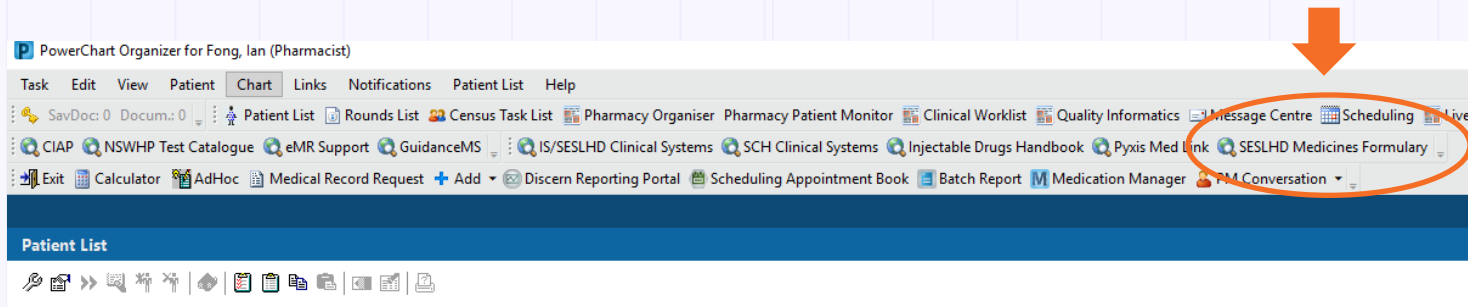

Most of a patient's home medications can and probably will be continued in hospital for continuity of care

The background features a light purple gradient with vertical lines. On the left, there is a blister pack containing ten red, circular tablets arranged in two columns of five. Surrounding the blister pack and the central text box are several capsules: one blue and white capsule at the top left, one orange and white capsule at the top right, one blue and white capsule at the bottom right, and one yellow and white capsule at the bottom right. The central text box is white with rounded corners and a subtle shadow.

What can we prescribe?

For new medications, we need to consider the medicines formulary

Search by the drug not
brand name (be careful
of combination products)

Medicine

simvastatin 40mg tablet

Inpatient initiation

Not approved

Atorvastatin, pravastatin, rosuvastatin are the formulary listed alternatives for initiation in inpatients

Continuation during inpatient admission

Continue

Outpatient supply from Hospital Pharmacy

SESLHD Medicines Formulary Master v1

umec|

umeclidinium 62.5 microgram powder for inhalation, actuation (Incruse Ellipta)

umeclidinium 62.5 microgram/actuation + vilanterol 25 microgram/actuation powder for inhalation, actuation (Anoro Ellipta)

SESLHD Medicines Formulary Master v1

fluticasone|

fluticasone furoate 100 microgram/actuation + umeclidinium 62.5 microgram/actuation + vilanterol 25 microgram/actuation powder for inhalation, actuation (Trelegy Ellipta)

fluticasone furoate 100 microgram/actuation + vilanterol 25 microgram/actuation powder for inhalation, actuation (Breo Ellipta)

fluticasone furoate 100 microgram/actuation powder for inhalation, actuation

fluticasone furoate 200 microgram/actuation + umeclidinium 62.5 microgram/actuation + vilanterol 25 microgram/actuation powder for inhalation, actuation (Trelegy Ellipta)

fluticasone furoate 200 microgram/actuation + vilanterol 25 microgram/actuation powder for inhalation, actuation (Breo Ellipta)

fluticasone furoate 200 microgram/actuation powder for inhalation, actuation

Medicine

tapentadol 50 mg tablet

Inpatient initiation

Approved

On the advice of a pain service for chronic pain unresponsive to non-opioid analgesia.

Continuation during inpatient admission

Continue

Outpatient supply from Hospital Pharmacy

Not approved

If needed, we can give a small supply to them on discharge
(Note: outpatient supply \neq discharge supply)

Individual Patient Usage (IPU)

- Required for:
 - Initiating any medication not on the formulary
 - Using a medication for an off-label indication
- Supporting evidence for the proposed medication/indication is required
- Cost of the proposed medication and regimen is required (ask pharmacist for help)
- Signatures of approval required from:
 - Head of Department
 - Nursing or Medical Co-director of your clinical stream
 - Director of Clinical Services
 - General Manager (if cost > \$10,000)
- Completed paper form should be sent to your pharmacist plus SESLHD-POW-PharmacyIPUs@health.nsw.gov.au
- If treatment is urgent, then notify your pharmacist and they will escalate further
- If treatment is urgent and it is after-hours, escalate to Director of Clinical Services
- We will soon transition to an online portal to make submissions easier

IPU Application Form

 **IPU** Application Form

Use this form to apply for approval for use of a non-formulary medicine in an individual ... submission will be required if a drug is used on an **IPU** basis in more than 3 patients ...

seslhdweb.seslhd.health.nsw.gov.au/.../SESLHDF020-IPUApplicationFor...

IPU Application Form

Health
South Eastern Sydney
Local Health District

Use this form to apply for approval for use of a non-formulary medicine in an individual patient, or for use of medicine outside of the formulary restrictions.

In most circumstances, a formulary submission will be required if a drug is used on an IPU basis in more than 3 patients. In such cases, the [formulary submission form](#) should be used instead of this form.

Please complete all required fields of this form electronically. Incomplete or handwritten forms will not be accepted.

Priority

NOT URGENT: review at next Drug and Therapeutics Committee meeting ☐

URGENT: within 24 hours ☐ within 1 to 3 working days ☐ within 4 to 7 working days ☐

Please justify reason for clinical urgency:

Patient details

Patient name:

MRN:

Date of Birth:

Weight:

Location (hospital/ward/clinic):

Is this patient's area of residence outside SESLHD?

Special Access Scheme (SAS)

- Supply of medications not licensed by the TGA
- Must obtain patient consent prior to use
- Category A
 - Medications that are for seriously ill patients or life-threatening conditions
 - Pharmacy can supply the medication immediately
- Category B
 - Medications that do not fit Category A or C
 - Pharmacy cannot supply until TGA approval received
- Category C
 - Medications with an established history of use
 - Pharmacy can supply medication immediately if being used for the approved indication
- Applications must be submitted via the online portal:
<https://compliance.health.gov.au/sas/>
- You will need to make an account and request to join 'Prince of Wales Hospital' as a site (ask the pharmacist to help you)

Australian Government
Department of Health and Aged Care
Therapeutic Goods Administration

Regulatory and Compliance

Log in

Register now >

Special Access Scheme & Authorised Prescriber Scheme Online System

The TGA has a responsibility to encourage the use of therapeutic goods that are included in the [Australian Register of Therapeutic Goods \(ARTG\)](#), as these products have been evaluated to ensure they meet strict standards of safety, quality and effectiveness.

The [Special Access Scheme \(SAS\)](#) and the [Authorised Prescriber \(AP\) scheme](#) allow certain registered health practitioners to access 'unapproved' therapeutic goods for patients under their care.

Prescriber responsibilities and conditions

- Use in exceptional circumstances where the prescribing health practitioner has first considered other appropriate treatment options included in the ARTG.
- Adhere to relevant standards of good medical practice and obtain informed patient consent.
- [Report adverse events or defects](#) associated with the use of the 'unapproved' therapeutic goods to the TGA.

02

Medication Reconciliation

The process of obtaining, verifying and documenting an accurate list of a patient's current medications and comparing this list to the admission, transfer or discharge medication orders.

Confirming that the medications that should be prescribed match those that have been actually prescribed. Transitions of care are especially prone to unintended changes and medication errors.

The background features a light blue gradient with vertical lines. Scattered around are several pills: an orange and white capsule, a blue and white capsule, a yellow and white capsule, and an orange and white capsule. A central blister pack contains two columns of red circular pills. The text is contained within a white rounded rectangle and an orange star.

The **admitting team** is ultimately responsible for ensuring that medication reconciliation and medication reviews have occurred.

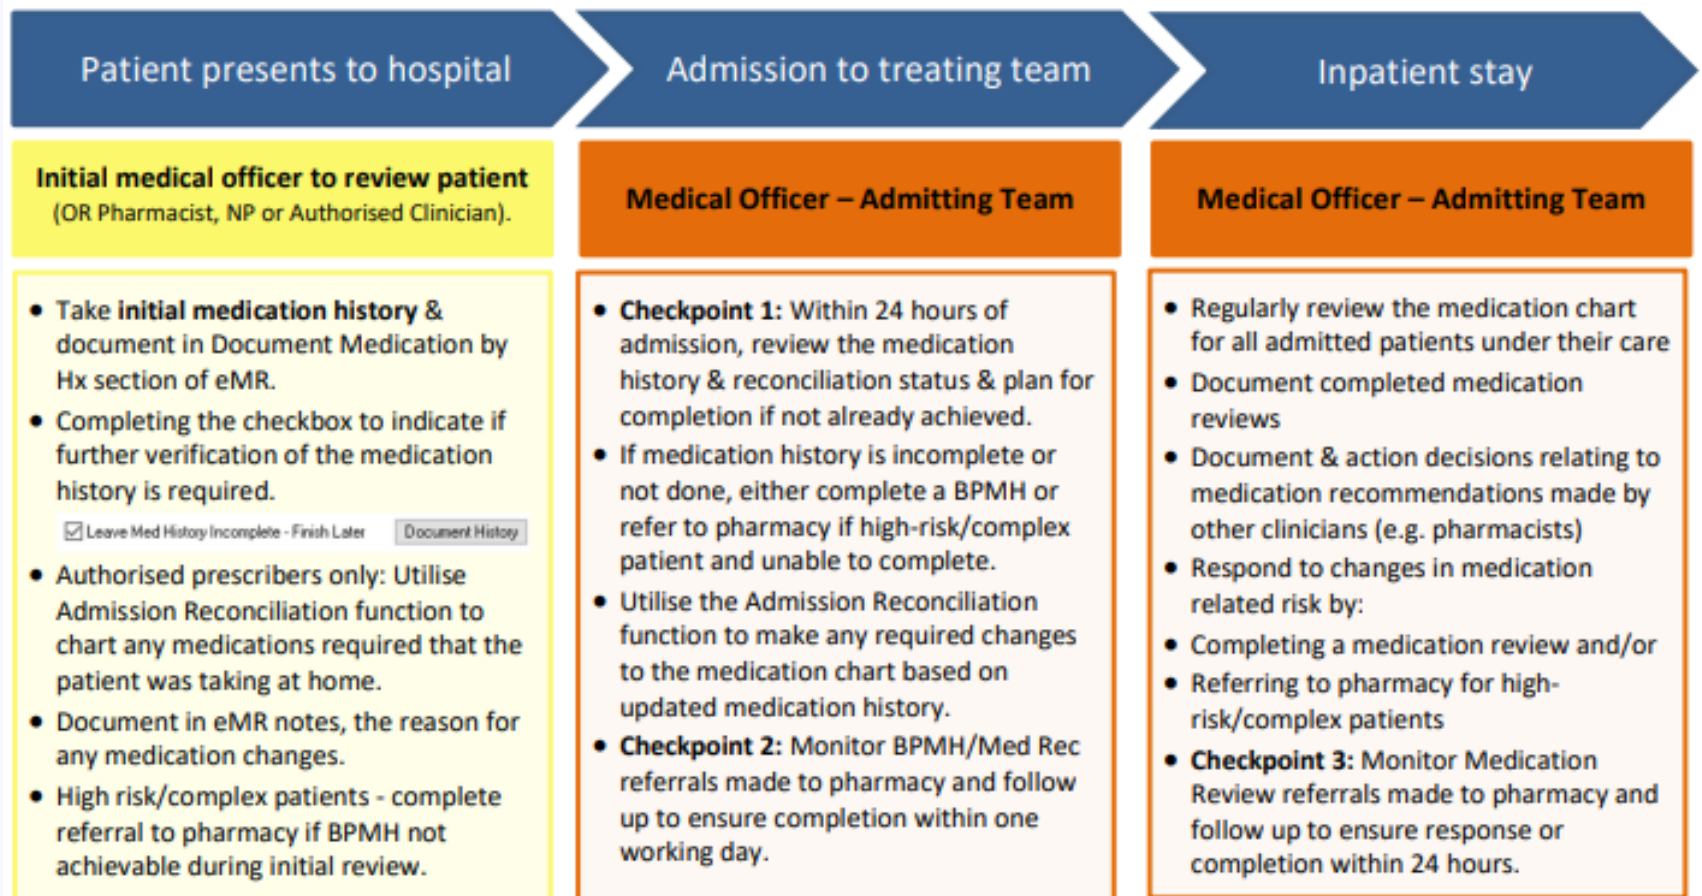

BUT
pharmacists
are here to
share the
responsibility

SESLHD PROCEDURE

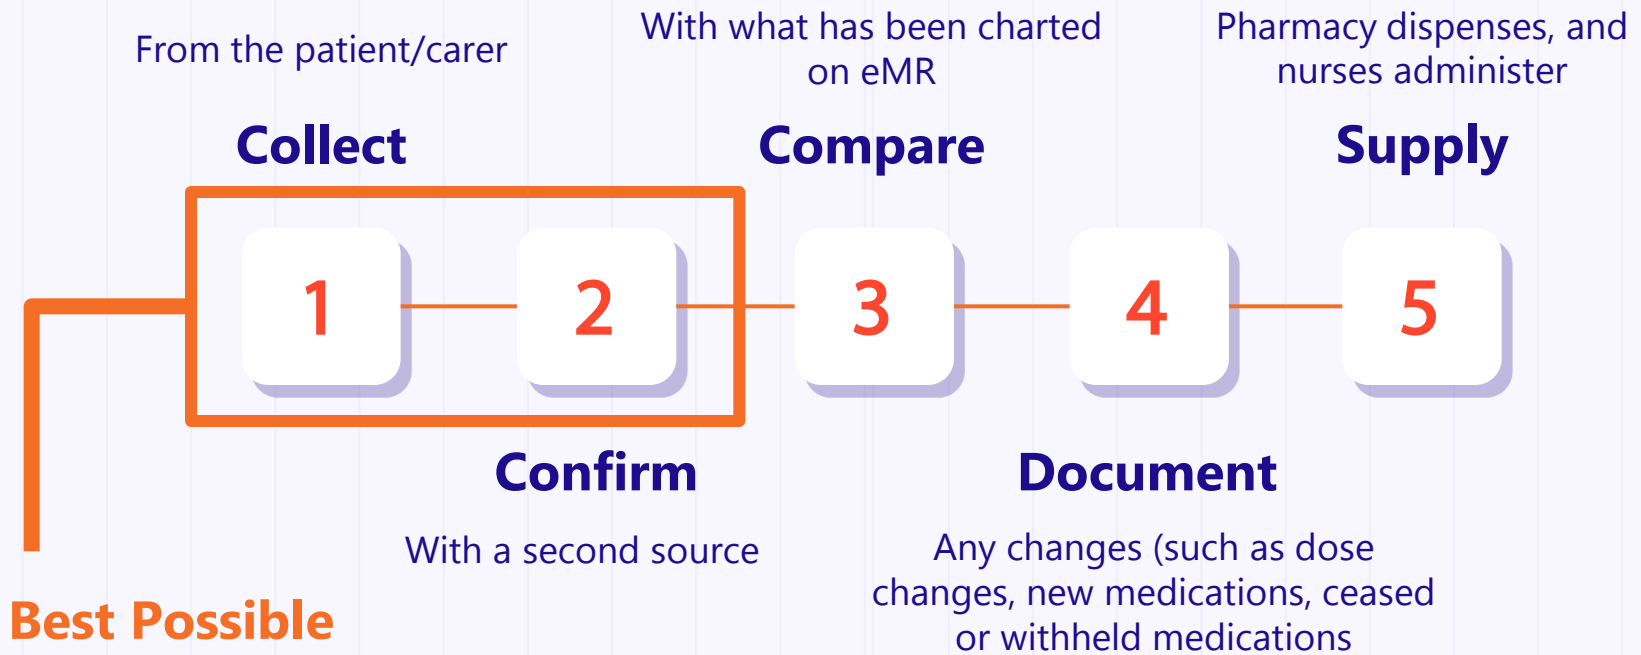

Medication Management Roles & Responsibilities of Clinicians

SESLHDPR/267

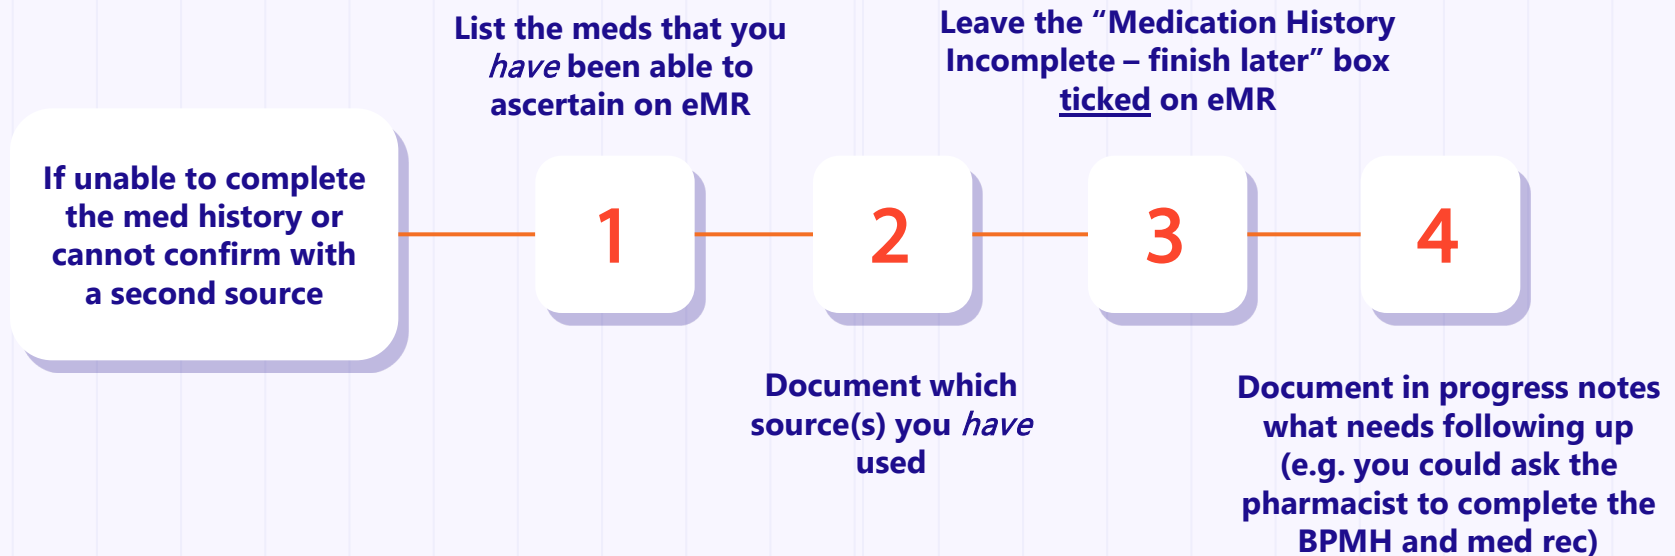

10. APPENDIX A: SUMMARY OF ROLES AND RESPONSIBILITIES IN MEDICATION MANAGEMENT ON ADMISSION

Medication Reconciliation

Unable to obtain a BPMH?

☒ Leave Med History Incomplete - Finish Later

Leave ticked – if further information/verification is needed. You can still prescribe on the medication chart. You can come back and complete the med history later or ask your pharmacist to help you.

Untick – if all information has been verified with at least TWO reliable information sources and no further information is required. Remember that BPMH = two sources of information.

03

Discharge Prescriptions

Discharge Prescriptions

- Discharge prescriptions are generated from eMR
- Pharmacy requires two printed documents:
 1. POV2 scripts
 - **only** meds that need to be supplied
 2. Medication list section of the discharge summary
 - **all** meds needed to be listed (including home meds that are to be continued, even if we didn't chart them in hospital)
- Generally, **up to 7 days** supply of **new** medications or **changed** doses are given to the patient (default quantity on eMR). However there are exceptions.
- Include other relevant information where appropriate:
 - Stop dates (e.g. antibiotic course, short-term analgesics)
 - Tapering/titrating regiment (e.g. steroid weaning course)
 - When it should be reviewed by GP (e.g. electrolyte replacements, opioid analgesics for acute pain)

Discharge Prescriptions

Some exceptions:

- There may be times where you **supply more than 7 days**
 - Complete a short-term course (e.g. steroids, antibiotics, VTE prophylaxis after surgery, treatment phase of a VTE)
- Ensure that the required quantity is specified on the prescription
 - Pharmacists can legally supply a lower quantity to what is originally printed on the prescription, however they cannot supply more
 - A new prescription with the higher quantity would need to be generated by the doctor
- There may be times where you **supply all the medications** even if they are home medications
 - New admission to an aged care facility
 - Transfer to a rehab or private hospital
 - Patient has no supply left at home and cannot feasibly obtain more prescriptions/supply from their GP/community pharmacy

Discharge reconciliation window

Discharge summary

Discharge Referral Note – eMEDs

Smith, Mr John MRN 1XXXXXX1

DOB 27/04/1945

- Community nursing for dressing changes
- Continue metformin 500mg nocte. If requiring further control of sugars, would recommend linagliptan as additional agent.
- Augmentin Duo Forte 1 tab BD for 5 more days for HAP
- Candesartan, frusemide and spironolactone ceased – GP to kindly review need to restart
- Follow up with Dr BB (endocrinology) in diabetes clinic in February – will call with time for appointment

The above has been discussed with the patient and acknowledged.

Thank you for your continued care.

Regards,

Dr XX XX

Junior Medical Officer

Cardiology Department

Prince of Wales Hospital

Discharge Plan

The Hospital may have supplied small quantities of new or changed medications

Medications being taken on discharge

Amoxicillin-clavulanate (Augmentin Duo Forte 875mg-125mg oral tablet) 1 tab, oral, TWICE a day with food until 1/1/2021

Metformin (metformin 500mg oral tablet) 1 tab, oral, ONCE a day with food

Oxycodone (OxyNorm 20mg oral capsule) 1 cap, oral, TWICE a day, PRN for breakthrough pain for 3 days only

Paracetamol (Panadol 500mg tablet) 2 tabs, oral FOUR times a day for pain relief

Medication previously recorded that has not been reviewed this visit

Nil

Medication ceased during this admission

Candesartan (candesartan 16mg tablet)

Furosemide (Lasix 40mg tablet)

Spironolactone (Aldactone 25mg tablet)

Completed Action List:

*Perform by XX XX (JMO) on 28 December 2020

BINDING MARGIN – DO NOT WRITE

If working in clinics, you may also need to write outpatient scripts that patients are to get filled at outpatient pharmacy

- S100 HSD meds
- Certain non-PBS meds

Most of these meds are only subsidised in a hospital outpatient pharmacy. Scripts may be invalid in the community.

For S100 meds, check the PBS website for:

- 4 digit streamlined authority number
- maximum allowable quantity and repeats

04

Pharmacy Services

What do pharmacists do?

Clinical

- BPMH and med rec
- Chart reviews
- Patient education
- Facilitating discharges

Manufacturing

Drug enquiries

- Drug interactions
- Dosing (e.g. in renal impairment)
- Therapeutic drug monitoring

Research projects

Education

- Nurses
- Doctors
- Allied health

Medication supply and distribution

Medication safety

- Audits
- Committees
- Ward rounds

Clinical trials

Pharmacy Service

High Risk – Proactive Pharmacy Service	Other Risk – Referral Based Pharmacy Service
Geriatrics Respiratory Medicine Cardiology Intensive Care Unit Orthopaedics Renal Medical General Surgery/Upper GI Surgery Cardiothoracic Surgery Infectious Diseases Neurology Medical Oncology Gastroenterology Haematology Acute Spinal Medicine Psychiatry	Acute Surgery Colorectal Surgery Neurosurgery Vascular Surgery Plastic Surgery Oncological Surgery Ophthalmology Oral and Maxillofacial Surgery Urology Ear, nose and throat surgery Palliative care Endocrinology Neurointervention Rheumatology Dermatology Immunology Spinal Rehabilitation General Rehabilitation Geriatric Rehabilitation Mental Health Rehabilitation Aged Psychiatry Neuropsychiatry

Specialty based model

- Proactive
- Referral only

Exceptions:

- ED
- ICU
- CAU

- Order a pharmacy consult regardless of the patient's specialty.

- Ordering a pharmacy consult is especially important for **high risk** patients who are admitted under a 'referral only' specialty

- Consults can be ordered on the weekend as well

Referral Criteria for Pharmacist Medication History / Reconciliation

1. Patients to be admitted or admitted as an inpatient (LOS > 24 hours anticipated), AND
2. Initial and/or admitting clinician unable to complete BPMH due to complexity, AND
3. Patient has 1 or more risk factors (see below table for examples)

Referral Criteria for Pharmacist Medication Review

Patient has 1 or more risk factors (below table for examples)

Patient Risk Factors	Medication Risk Factors
3 or more chronic comorbidities	High-Risk Medicine Groups:
Acute confusion/delirium	Anti-infectives
Acute Kidney Injury or CKD with eGFR<30mL/min/1.73m2	Potassium and electrolytes
Atrial Fibrillation	Insulin
Epilepsy	Narcotics (opioids and sedatives)
Liver dysfunction	Chemotherapeutic agents
Parkinsons Disease	Heparin and other anticoagulants
Pregnant/Breastfeeding	Cannabis products
Swallowing Difficulties	Clozapine
Transplant	Lithium
	Methotrexate or other immunosuppressants
	Opioid Treatment Program

Business Hours (Monday to Friday, 08:30 to 17:00 hrs)

Consults will be completed within 24 hours, or the referrer will be contacted.

If **URGENT** review required, **please page the relevant ward/specialty Pharmacist in addition** to completing the referral.

Saturday, Sunday and Public Holidays

Consults will be completed within 24 hours on Saturday and Sunday, or the referrer will be contacted.

If **URGENT** review required, **please page the Medication Management Team Pharmacist on 40963 in addition** to completing the referral.

Ordering a pharmacy consult on FirstNet (in ED)

From the FirstNet Whiteboard click on the patient you want to refer then...

- Click on the Set Event icon (yellow arrow)
- A pop up box opens → tick the box for Pharmacist Review HP then click OK

- A Pharmacist Review HP icon (mortar & pestle) appears in the 'To Do' column. Once the pharmacist has completed their review, they will complete the referral and it will move to the Done/Complete column:

POWH Pharmacy Department

- Pharmacy Department is located on Level 2, Clinical Sciences Building (near the High St entrance, between the Parkes and Dickinson Buildings)
- Main operations are Monday to Friday (Inpatients 8:30am-5pm, Outpatients 9am-4pm)
- Give discharge scripts to your pharmacist by 3pm for same day discharge on weekdays
 - If you don't know who is covering your specialty, then send the script to pharmacy
 - Preparation time varies depending on the day but can be 2 hours
 - At least 24-hours notice required for patients on Webster packs as we need to liaise with their regular community pharmacy to update their pack
 - At least 24-hours notice required for patients discharging on antibiotic infusors
 - If patient is discharging over the weekend, try to have discharge meds organised during the week
- Weekend service
 - Dispensary (inpatient supply and urgent discharge supply) – Saturday only
 - Clinical cover in ED – Saturday and Sunday
- If your regular pharmacist is on leave, there will be another pharmacist relieving and they will be carrying the same pager
- On-call pharmacist available after hours 5pm-8:30am
- When you start your rotation, get to know your specialty/ward pharmacist
 - Decide on preferred method of communication
 - Spend some time going through any specialty/unit specific information with them

Thanks
