

Where is this data from?

Reports and updates available on this website are produced by the Public Health Unit, South Eastern Sydney Local Health District.

Surveillance reports are produced using:

- Notifiable Conditions Information Management System (NCIMS) for NSW Health
Source: Communicable Diseases Branch, *Notifiable Conditions Information Management System*, Sydney: NSW Department of Health, 2009
- Public Health Real-Time Emergency Department Surveillance System (PHREDSS) for NSW Health.
Source: Public Health Division, *Public Health Real-time Emergency Department Surveillance System*, Sydney: NSW Department of Health, 2003
- Sentinel Laboratory Surveillance, through Epi Info™ for NSW Health.
Source: Public Health Division, *Epi Info*, Sydney: NSW Department of Health, 2004.
- GP sentinel surveillance, through Electronic General Practitioner Surveillance (e-GPS) for NSW Health
Source: Public Health Division, *Electronic General Practitioner Surveillance*, Sydney: NSW Department of Health, 2011

Graphs and tables are generated using:

- SAS (SAS Institute, USA)
- SPSS (SPSS Inc., USA)
- Microsoft Excel (Microsoft Corporation, USA)

How do I use this data?

This data is available freely to the public. Appropriate acknowledgement of the Public Health Unit, South Eastern Sydney Local Health District, should accompany any approved use of the data.
