

Join a tour of the St George Hospital Acute Services Building at the Open Day.

Community and Staff will be able to tour the new Acute Services Building and see the new state of the art facilities and equipment.

The Acute Services Building will improve the ability to manage the sustained increase in demand for services by the community and beyond. Some of the key additions include eight new additional operating suites, a new integrated Intensive Care Unit (ICU) with 52 beds, and an additional 128 in-patient unit beds.

The community will have the opportunity to visit the new facilities including the operating suites, inpatient unit and intensive care unit before they become operational. Registrations for tours are now open. Go to Eventbrite.com and search for St George Hospital Acute Services Building Open Day.
